

ATTE ELIEL NÄRHI

Education 01-05/2026	NEW JERSEY CITY UNIVERSITY Master of science in business information systems. Exchange period student one semester. Studying computer and data science as well as computer and network security. Published three research papers.	New Jersey, USA
2025-present	METROPOLIA UNIVERSITY OF APPLIED SCIENCES Master of engineering in business informatics. International interdisciplinary combining computer and data science with focus on digital transformation, data-driven decisions and business modeling.	Vantaa, Finland
2019-2022	Batchelor of engineering in electronics. International studies major in power electronics and specialized in radio technology, product development, measurements. Active community role in maintaining equipments, handling component stock and supporting students in laboratory.	
Experience 09-12/2025	AGORA LEGAL Sales development representative consultant Sales execution for an early-stage legal tech startup. Booked 61 intro meetings in three months with CEOs. Owned new customer acquisition by managing CRM (Pipedrive), outbound prospecting, cold calling and attending industry events.	Helsinki, Finland
2022-2025	COZIFY Electronics engineer Developed and validated IoT gateway hardware in a fast-paced product development environment, working across hardware, manufacturing, backend, and frontend interfaces in collaboration with cross-functional team.	Espoo, Finland
	Bachelor's thesis Improved business critical radio performance, over three times. Free space range was improved from 50 m to +160 m, by increasing the receiver sensitivity and tuning the antenna. EMC chamber radiation pattern measurements were included.	
	EU funded research project Owned design, installation and testing of technical capabilities for geothermal heat pump remote management. The proof of concept was made possible by the solution. Delivering Fingrid FCR compliant 400 VAC systems with Modbus (RTU) integration and power consumption monitoring to four sites.	
	Smart home solution Implemented a software solution and exceeded profit expectations by three times. Three additional clients bought it (software update) resulting in a near 100% profit margin. Conducted measurements with 230 VAC capturing power factors and waveforms. Developed an algorithm based on measurements and client issue.	
Publications	Närhi, A. E. 2026. Policy Enforcement Through IDPS and Embedded Secure Design. Course research paper, SECU 611 – Intrusion Detection & Prevention Systems, Laurea UAS (instructor: Prof. Mohammed Aftab). Närhi, A. E. 2026. Wi-Fi Penetration Testing and the Limitations of Wireless Networks. Course research paper, SECU 612 – Computer Network & Network Security, Laurea UAS (instructor: Prof. Mohammed Aftab).	
Personal	Values continuous learning, in 2024 joined year-long rhetoric and communications program with one-on-one coaching, in 2025 attended Linux shell and C fundamentals four-week intensive crash course at the coding school Hive. Additionally studied 35 ECTS credits of marketing in open universities. Curious and continually pushing myself to new challenges in 2025 finished first marathon in 3:38. Former water polo player and current surfer and enjoyer of philosophy.
